

## The War Shrine

The war shrine in the High Street is often regarded as the War Memorial. There is no record as to when or why this ugly brick wall was first used for this purpose. It was erected by the spitefully litigious Victorian lawyer George Eyre of High House to lampoon his many enemies, and as such seems a strange choice for so honourable a venue. In 1924 Mr Quixley the headmaster recorded in his daily log for November 11<sup>th</sup> that the school children attending a memorial at the 'war shrine', yet the church memorial was installed 3 years earlier. Cynthia Winfield, now 91, remembers the school's upper class marched there for an annual ceremony. Other brief memoir comments imply the shrine may have been used to remember all the combatants in the two World Wars, whereas the church memorial contains only the names of the fallen.
